Introduction :

This information forms part of your Benefit Illustration.

We (TM Asia Life Singapore Ltd.) believe it is important that you fully appreciate all the benefits under policy, and that you also understand how the cost of the insurance protection, distribution, administration, investment and other costs affect these benefits.

The Benefit Illustration includes a schedule that shows how the value of your Policy changes over time. The computation and methods used to calculate this schedule follow guidelines, which have been established by the life insurance industry to ensure that a fair and consistent approach is used in preparing this illustration.

This important information is set out below. If you need clarification, please do not hesitate to ask your Adviser.

Total Distribution Cost :

This section shows the total costs we may expect to incur. These costs include cash payments in the form of commission, costs of benefits and services paid to the distribution channel. The Total Distribution Cost is an accumulation of each years' expected costs, but with no interest added.

The Total Distribution Cost is not an additional cost to you; it has already been allowed for in calculating your premium.

CPF Interest Rate (applicable to policies purchased under CPFIS) :

The CPF interest rate for the Ordinary Account (OA) is based on the 12-month fixed deposit and month-end savings rates of the major local banks. Under the CPF Act, the Board pays a minimum interest of 2.5% per annum when this interest formula yields a lower rate.

From 1 Jan 2008, the new interest rate for the Special, Medisave and Retirement Accounts (SMRA) will be pegged to the yield of 10-year Singapore government bond plus 1%. For 2008 and 2009, the minimum interest rate for the SMRA will be 4.0% per annum. After 2009, the 2.5% per annum minimum interest rate, as prescribed by the CPF Act, will apply to the SMRA.

In addition, from 1 January 2008, the CPF Board will pay an extra interest rate of 1% per annum on the first \$60,000 of a CPF member's combined balances, including up to \$20,000 in the OA. And from 1 April 2008, the first \$20,000 in both the Ordinary and Special Account will not be allowed to be invested under the CPF Investment Scheme. The \$20,000 investment threshold under the Special Account has been raised to \$30,000 from 1 May 2009.
